General Experience

Heiko heads the financial markets practice group in Germany. His practice area is broad based, focusing on acquisitions, restructuring, tax aspects of capital markets transactions and cross-border tax planning. Special areas of advice include in particular fund taxation aspects of both investors and asset managers under the German Investment Tax Act.

Heiko is a partner in the German tax department in the Frankfurt office and joined Simmons & Simmons in 2007. He qualified as a Rechtsanwalt (German lawyer) in 2000 and was admitted as a qualified tax advisor (Steuerberater) in 2004.

Chambers Europe cites clients who describe him as a 'creative and technically very capable lawyer' (2015) and a 'very good tax lawyer' who is widely acknowledged for 'his depth of knowledge' (2016).

The leading handbook of German commercial law firms, JUVÉ Handbook 2015/2016, lists Heiko as a 'frequently recommended' tax lawyer and confirms that the Simmons & Simmons tax team is a 'respected tax practice' that secures its veritable position 'with a clear focus regarding the advice in asset management, of investment funds and financial services'.
